

Jeremy Myung

626-224-1060 | jeremyjerim@live.com | <https://www.linkedin.com/in/jeremymyung/> | github.com/audwofla/

Education

Tufts University – MS in Computer Science	May 2025
Tufts University – Post-Baccalaureate in Computer Science	May 2024
Andrews University – BMus Music Performance	May 2021

Projects

Gear Tracker github.com/audwofla/gear-tracker

- Built a Reddit marketplace tracker that monitors used camera gear listings and stores listing and price history in PostgreSQL.
- Designed an AI-assisted matching pipeline that routes low-confidence listings to Claude or a local LLM for parsing, item identification, and bundle handling.
- Created token-based subset matching logic to handle messy listings, including abbreviations, alternate names, inconsistent formatting, and multi-item bundles.
- Implemented a feedback loop that saves confirmed aliases, canonical item mappings, and keywords to PostgreSQL to improve future rule-based matching and reduce repeated AI calls.

Lesson RouteMaster github.com/audwofla/Lesson-RouteMaster

- Developed a full-stack MVC application using React.js, Node.js/Express, and PostgreSQL for managing music lesson scheduling and student records
- Designed secure REST APIs and relational schemas for lesson logistics, communication, and progress tracking
- Integrated Google Maps API and Google OR-Tools to compute optimized multi-stop routes using a Traveling Salesperson heuristic

Aramalyze github.com/audwofla/Aramalyze

- Built an end-to-end ARAM analytics pipeline (Python, PostgreSQL) integrating Riot and Fandom APIs for data ingestion
- Designed patch-versioned relational schemas and ETL workflows for participant-level match storage
- Engineered ML feature pipelines and trained win-rate prediction models using scikit-learn

Skills

Languages: Python, JavaScript, C++, SQL, C, Java, HTML/CSS

Frameworks & Tools: Node.js, React.js, Express, PostgreSQL, MySQL, MongoDB, scikit-learn, Git, Claude API

Work Experience

AI Model Evaluator | HAI May 2026 – Present

- Evaluated outputs from a frontier coding agent on multi-turn software engineering and coding tasks, judging correctness, helpfulness, instruction-following, and communication quality.
- Created and reviewed AI benchmark tasks across multimodal reasoning and commonsense reasoning domains, including charts, maps, diagrams, tables, infographics, and text-based scenarios.
- Designed prompts to test visual reasoning, OCR, spatial reasoning, temporal reasoning, causal reasoning, goal/intent inference, and social commonsense.
- Reviewed contributor submissions for correctness, ambiguity, category fit, distractor quality, and reasoning reliability.

Violin Teacher | Independent Studio/Music & Arts June 2021 – Present

- Operated a teaching studio, managing scheduling constraints, billing workflows, and client communication
- Designed structured curriculum with measurable milestones to track student progress over time
- Organized student recitals, managing venue coordination and scheduling rehearsals
